

LUME

Product Requirements Document

Document Title	Lume – Mobile Application Product Requirements
Prepared By	Sahil Pawar (Founder & CEO)
Prepared For	CTO / Engineering Team
Version	1.0 – Initial Draft
Date	May 28, 2026
Status	For Review

1. Executive Summary

Lume is a premium mobile application designed to connect users with professional makeup artists for on-demand and scheduled beauty sessions. Positioned in the Indian beauty-tech market (initially Mumbai), Lume provides an elegant, intuitive platform for discovering, evaluating, and booking certified makeup artists for occasions including bridal, editorial, evening, natural, and glam looks.

This document outlines the functional and non-functional requirements for the Lume MVP (Minimum Viable Product), intended to guide the engineering and design teams in building the first production release.

2. Product Overview

2.1 Vision Statement

"Your canvas. Our masterpiece." Lume aims to be the go-to luxury beauty booking platform that makes professional makeup artistry accessible, discoverable, and seamlessly bookable for every occasion.

2.2 Target Users

- Primary: People aged 18–45 in metro cities seeking professional makeup for events, weddings, photoshoots, and everyday occasions.
- Secondary: Professional makeup artists seeking a curated platform to showcase their work and manage bookings.

2.3 Platform

- Mobile-first application (iOS and Android)
- Prototype delivered as a responsive mobile web app (HTML/CSS/JS)

2.4 Market Context

- Primary geography: Mumbai, India (Phase 1)
- Competitive positioning: premium, curated, design-led, differentiated from generic service marketplaces

3. User Flow Overview

The application follows a linear discovery-to-booking flow across four primary screens:

Step	Screen	Description
1	Splash Screen	Brand introduction with tagline and CTA to enter the app
2	Home / Browse	Personalized greeting, search, service categories, featured banner, and artist listing
3	Artist Detail	Artist profile, stats, service menu, date/time selection, and reviews
4	Booking Confirmation	Order summary with artist, service, date/time, location, and payment details

4. Functional Requirements

The following table lists all required features, their description, and priority using the MoSCoW method (Must Have / Should Have / Could Have).

4.1 Splash & Onboarding

ID	Feature	Description	Priority
F-01	Splash Screen	Display branded splash with logo, tagline ('Your canvas. Our masterpiece.'), and 'Explore Artists' CTA button. Auto-advance or tap to proceed.	Must Have
F-02	Animated Entry	Animated gradient orbs and logo pulse on splash screen. Smooth page transitions throughout the app.	Should Have
F-03	User Greeting	Display personalised greeting with user's first name and time-of-day context on the home screen.	Should Have

4.2 Home Screen

ID	Feature	Description	Priority
F-04	Search Bar	Full-text search by artist name, style, or occasion. Includes a filter/settings button for advanced filtering.	Must Have
F-05	Notifications Bell	Notification icon with unread badge indicator in the top-right corner of the home screen.	Should Have
F-06	Hero Promotional Banner	Scrollable or static promotional banner highlighting featured offers (e.g. 'Bridal & Editorial Looks Near You'). Tappable — navigates to artist detail.	Must Have
F-07	Service Category Filter	Horizontally scrollable category chips: All, Bridal, Editorial, Evening, Natural, Glam. Active state visually distinct. Tapping filters artist list.	Must Have
F-08	Top Artists Listing	Vertical list of artist cards showing: photo/avatar, name, specialties, star rating, review count, distance, and starting price per session.	Must Have
F-09	Artist Badges	Contextual badges on cards (e.g. 'Top Pick', 'New') to surface curation signals.	Could Have
F-10	See All Links	Tappable 'See all' links next to section headers for categories and top artists to expand the full list.	Should Have

4.3 Artist Detail Screen

ID	Feature	Description	Priority
F-11	Artist Hero Image	Large hero area (300px) with the artist's portfolio image or avatar. Gradient overlay for text legibility.	Must Have
F-12	Back Navigation	Back button overlaid on hero image returns to previous screen.	Must Have

ID	Feature	Description	Priority
F-13	Favourite / Save	Heart icon to save/unsave an artist. Toggle between filled and empty heart with animation.	Should Have
F-14	Artist Stats Bar	Four key stats displayed horizontally: Rating, Reviews count, Years of Experience, Total Bookings.	Must Have
F-15	Service Selection	Horizontally scrollable service cards (Bridal, Editorial, Evening, Natural). Each displays icon, name, and price. Selection state is visually highlighted.	Must Have
F-16	Date Picker Strip	Horizontal scrollable strip of date chips (day + date number) for the next 7 days. Active date highlighted.	Must Have
F-17	Time Slot Grid	3-column grid of available time slots. States: Available, Selected, and Taken (struck through, non-interactive).	Must Have
F-18	Reviews Section	Display user reviews with avatar, name, star rating, and review text. 'See All' link to full reviews page.	Must Have
F-19	Confirm Booking CTA	Sticky bottom button showing selected service price. Tapping proceeds to booking confirmation.	Must Have

4.4 Booking Confirmation Screen

ID	Feature	Description	Priority
F-20	Confirmation Animation	Animated success ring/checkmark on booking confirmation.	Should Have
F-21	Booking Summary Card	Summary of the confirmed booking: Artist, Service, Date & Time, Location, and Total Paid.	Must Have
F-22	Back to Home	CTA button to return to home screen after confirmation.	Must Have

4.5 Navigation

ID	Feature	Description	Priority
F-23	Bottom Navigation Bar	Persistent tab bar with four tabs: Home, Discover, Saved, Profile. Active tab visually highlighted.	Must Have
F-24	Discover Tab	Search and browse page (full-screen search with filters). Scope: Phase 2.	Should Have
F-25	Saved Tab	List of favoured artists. Scope: Phase 2.	Should Have

ID	Feature	Description	Priority
F-26	Profile Tab	User account, past bookings, settings. Scope: Phase 2.	Should Have

5. Non-Functional Requirements

5.1 Performance

- App launch to home screen in under 2 seconds on a mid-range Android device.
- Artist list and detail pages load in under 1.5 seconds on a 4G connection.
- Booking confirmation completes within 3 seconds of CTA tap.

5.2 Design & Accessibility

- Design must adhere to the Lume brand palette: Rose (#F2A4B0), Deep Rose (#D97A8C), Champagne (#F5E6D3), Cream (#FDF6F0).
- Typography: Cormorant Garamond (serif, display) and DM Sans (body/UI).
- All interactive elements must have a minimum touch target of 44x44pt.
- Colour contrast must meet WCAG AA standards for body text.

5.3 Security & Privacy

- User PII (name, contact) must be encrypted in transit (TLS 1.2+) and at rest.
- Payment data must be handled via a PCI-compliant payment gateway (Razorpay or equivalent). No raw card data stored server-side.
- User data must comply with India's DPDP Act, 2023.

5.4 Scalability

- Backend architecture must support horizontal scaling to accommodate up to 10,000 concurrent users at launch.
- Artist and booking data must be served via a CDN-backed API for low-latency responses across India.

5.5 Reliability

- Target uptime: 99.5% monthly SLA.
 - Booking confirmation must be idempotent — duplicate submissions must not create duplicate bookings.
-

6. Out of Scope (Phase 1)

- In-app video portfolio of artists
- Real-time chat between user and artist
- Artist-side mobile app / artist dashboard
- Subscription or loyalty rewards system
- Multi-city expansion beyond Mumbai
- AI-powered look recommendation engine
- Social sharing of booking or look

7. Success Metrics

Metric	Target (3 months post-launch)
App Downloads	5,000+
Booking Conversion Rate	≥ 8% (Browse → Confirm)
Average App Store Rating	4.5+ stars
Monthly Active Bookings	500+ confirmed sessions/month
Artist Onboarding (Mumbai)	50+ verified artists

8. Open Questions for Engineering

- What real-time infrastructure will manage slot availability and prevent double-bookings? (WebSocket vs. polling)
- Will artist availability calendars be self-managed by artists, or admin-managed in Phase 1?
- What is the preferred payment gateway? (Razorpay assumed — confirm API integration scope)
- Should push notifications be in-scope for Phase 1 (booking reminders, slot alerts)?
- What is the user authentication strategy? (OTP/phone number, Google SSO, or email/password)
- Is location permission required for distance display, or is a static city/area used initially?

9. Document Revision History

Version	Date	Changes	Author
1.0	May 28, 2026	Initial draft created from prototype review	Sahil Pawar
